

June 2020

Junior Achievement of Southeastern Michigan Partners,

The Detroit Region has a long history of systemic racism and injustices. We cannot change the past; however, we can make the future trajectory of our children better, especially those from under-resourced, underrepresented, and underestimated communities.

Junior Achievement of Southeastern Michigan is ready and prepared to advance the youth of our community through thoughtful programming, volunteer engagement and exposure. We firmly believe that youth who participate in Junior Achievement are better prepared for the future of work and economic advancement no matter what obstacles lay before them.

All kids no matter their race, socio-economic status or family structure deserve the opportunities for their hopes and dreams to become reality. We are here to lead, inspire and prepare the next generation of young people for future success in a global economy. With your support we can continue to change the trajectory of our children.

Sincerely,

Jason D. Lee

President & CEO
